Note about balances: Ending daily balance reflects transactions that have posted to your account and does not reflect pending deposits or withdrawals. The available balance is an indication of funds that are available to you today; however, it may not reflect all transactions that you may have initiated or authorized.

Available Balance - our most current record of the amount of money in your account available for your use or withdrawal. It is adjusted throughout the day as we authorize, or receive notice of, pending transactions. Available balance does not reflect all of your transactions, such as checks you have written or debit card transactions that have been approved but not submitted for payment by the merchant. For more information regarding our funds availability policy and how we determine your available balance, please refer to your Deposit Account Agreement.

Wells Fargo Bank, N.A. Member FDIC.
